

Reinforcement for the SENSOTEC team

Armin Jud has been fully supporting the SENSOTEC team since December 2024. With his expertise and many years of international experience in lighting control, he is driving innovation and customer projects together with Andrea Lachner. We are delighted about the reinforcement and look forward to a successful future.

NEW

Ecosystem Casambi

The various NET sensors (PIR & HF) are now also available for the widely used Casambi ecosystem.

SENSOTEC NET

Eltefa trade fair appearance - 25 - 27 March 2025 in Stuttgart

A personal meeting at the STEINEL Exhibition Stand (Hall 8, Stand 8C41) offers us the opportunity to get to know each other in an informal setting and to talk about potential partnerships or joint projects. SENSOTEC will also be on the stand - an ideal opportunity to familiarise yourself with our product portfolio. It would be fantastic to hear your thoughts and visions for the future.

Make an appointment directly. We look forward to meeting you at the trade fair!
