- Water management

● One-stop shop

We work closely with our customers to develop innovative products, advising and supporting them as a one-stop-shop partner from the initial concept to the market launch, industrialising and manufacturing customer-specific product applications and customised solutions – all from a single source.

Product development

- ✓ Development of electronics
- ✓ Development & integration of firmware/software
- ✓ Mechanical development
- ✓ Development of operating & test equipment

Industrialisation

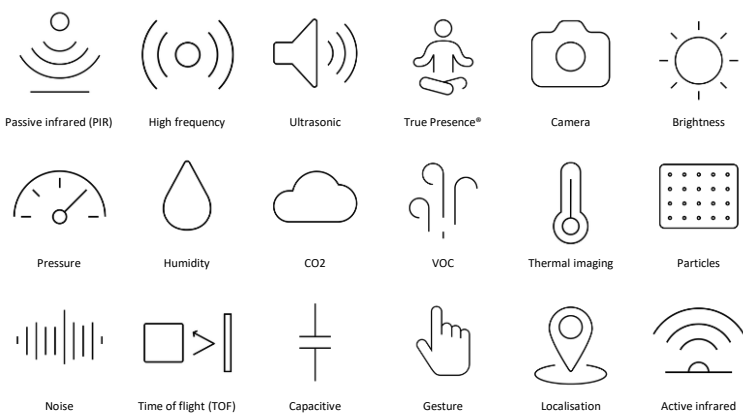

- ✓ Prototype building
- ✓ Test and equipment design
- ✓ IP protection & climate tests, EMC pre-compliance testing

Manufacturing

- ✓ Production of electronics
- ✓ Assembly & testing
- ✓ Plastic production

Services

Thanks to our broad service package, we are there to guide you from the initial concept to the finished product. We advise you and are happy to take on complex tasks such as procurement, quality management, product management, after-sales support and product life cycle management as soon as your product is in series production.

Sensor technology

Intelligent products

- ✓ High-frequency sensor technology
- ✓ Passive infrared
- ✓ Time of flight
- ✓ Thermal sensors
- ✓ Other sensors

Communication technology

Connectable products

- ✓ Bluetooth
- ✓ LoRaWAN
- ✓ Thread
- ✓ Wirepas
- ✓ IP500

IoT solutions

Ecosystem of the future

- ✓ IT security
- ✓ OTA updates
- ✓ Networking
- ✓ Frontend and backend
- ✓ App development

Technology expertise

We offer comprehensive expertise in the integration of sensor and communication technology for a wide range of applications and markets. As a reliable partner, we help you successfully integrate your product into the world of IoT.

SENSOTEC Light

Light management

- ✓ SENSOTEC NET Wireless Mesh
- ✓ SENSOTEC IPD (Input Device)
- ✓ SENSOTEC Monoblock
- ✓ SENSOTEC SR Sensor Ready

SENSOTEC Water

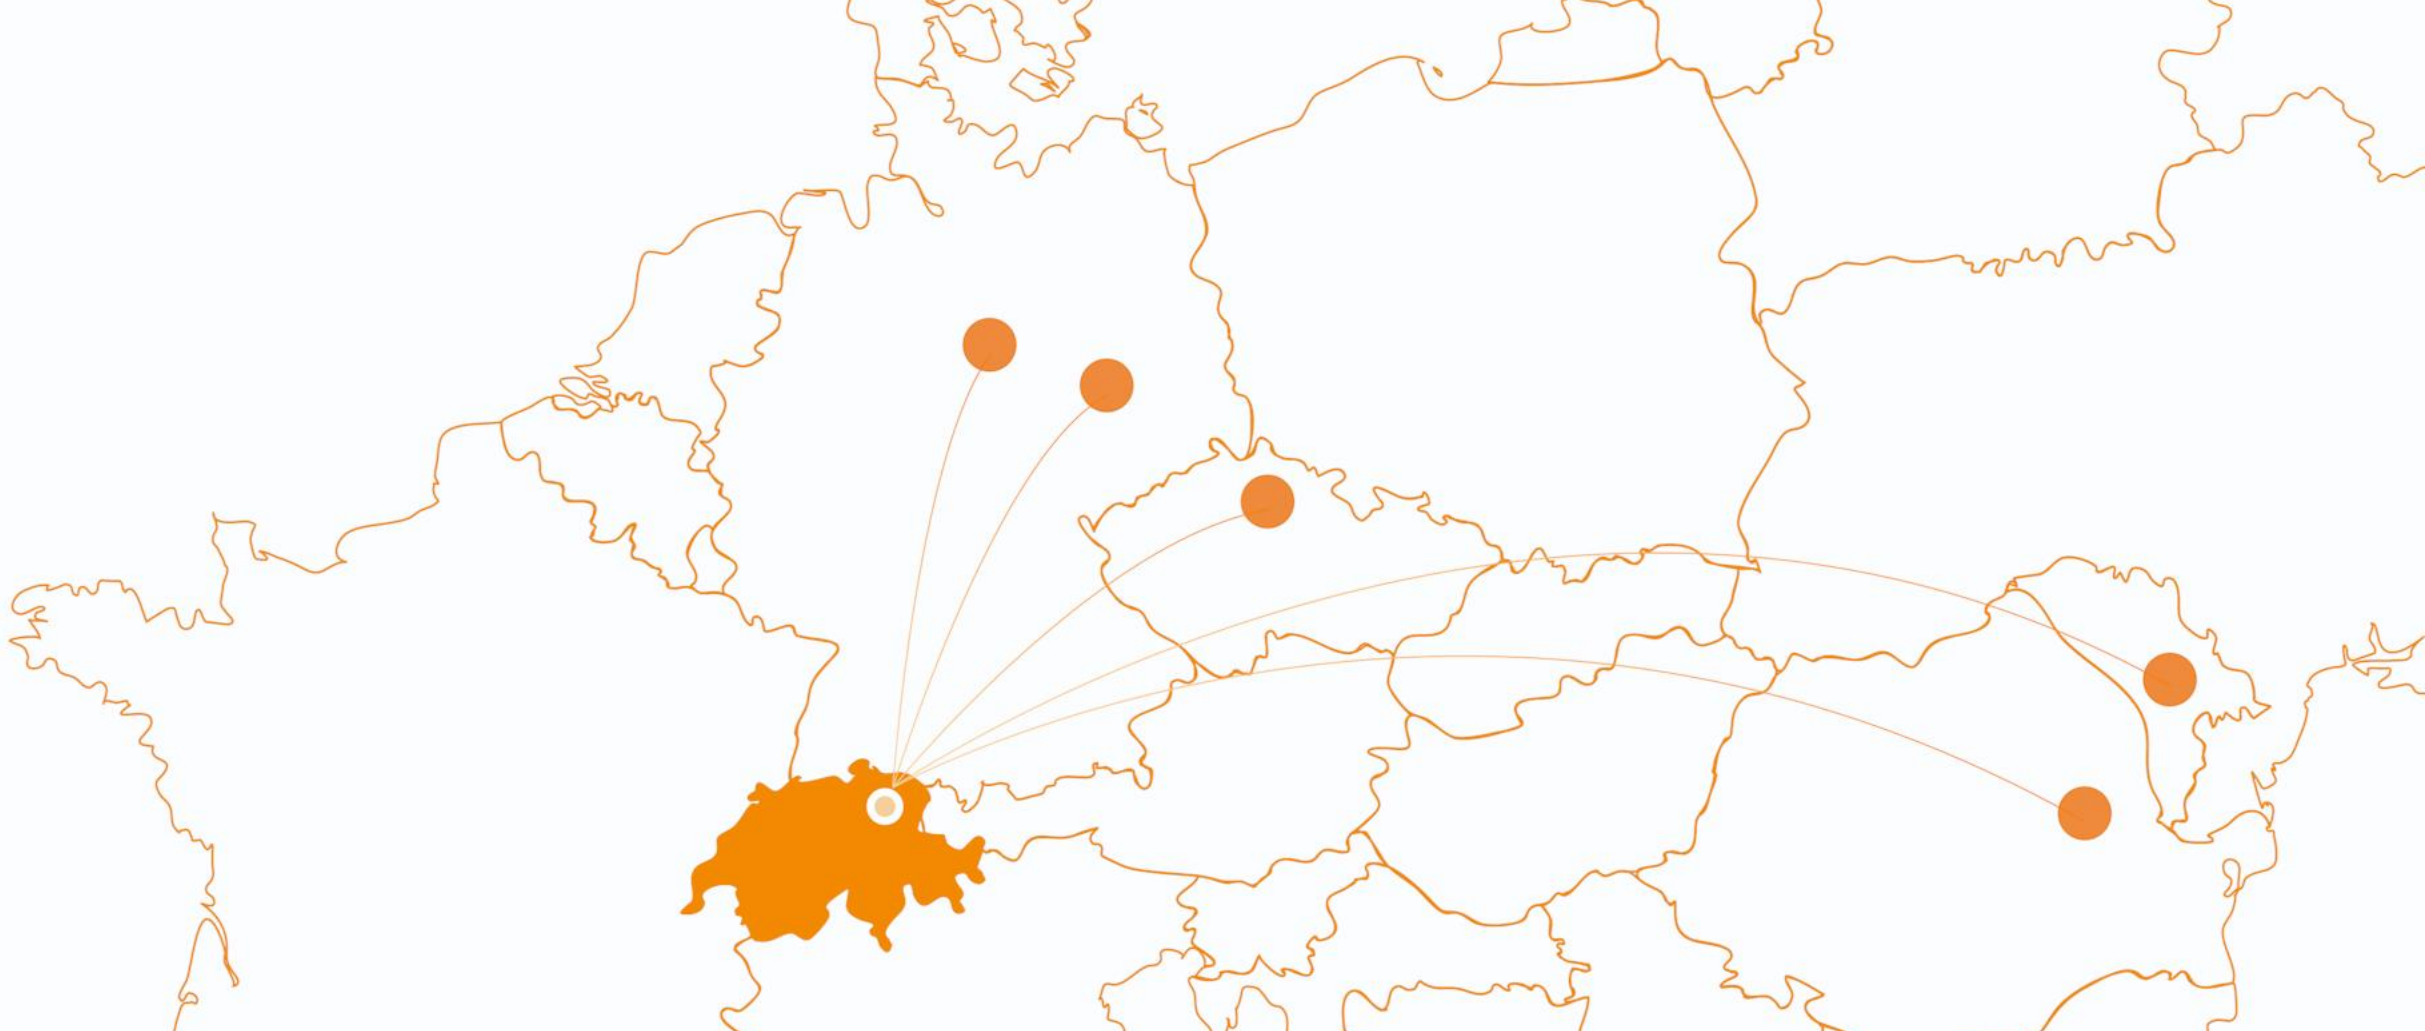

Water management

- ✓ SENSOTEC Sanitaer IR

SENSOTEC (proprietary products)

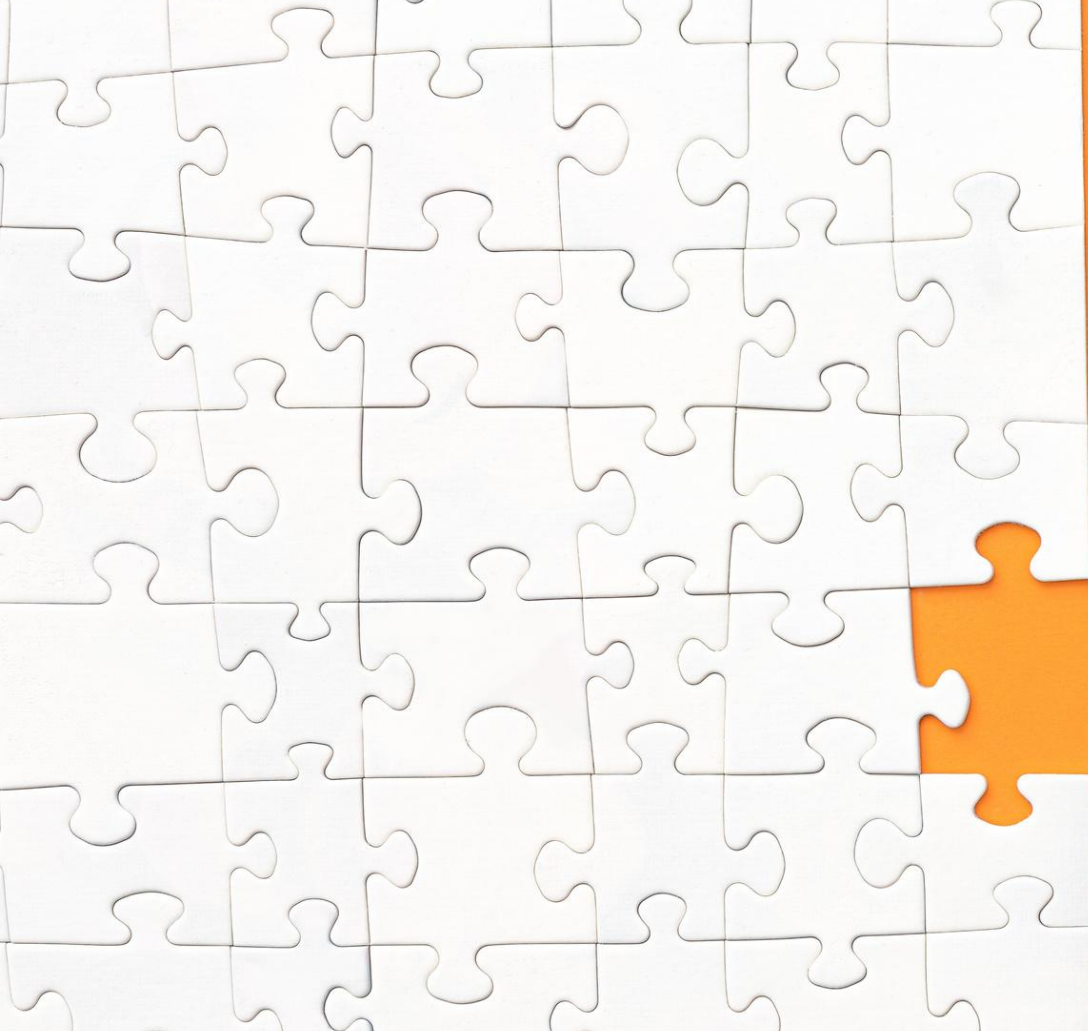

STEINEL is recognised as an innovation leader when it comes to intelligent solutions for lighting, water and building management. Equipped with its own SENSOTEC product portfolio, STEINEL Solutions offers smart standard sensors for light and water management.

● Based in the heart of Europe

As a member of the STEINEL Group, we have access to a network that spans all of Europe. Depending on the product life cycle and market success, we make it possible to scale up quickly and adequately and expand the series assembly of large-volume products to additional locations. Made by STEINEL. Made in Europe.

Passion and expertise

Innovative technology integration

Partnership

● Why STEINEL Solutions?

Our team transforms your ideas into high-quality, marketable products. As a trusted partner, we offer flexibility and price stability. We maintain close partnerships characterised by our values and a deep sense of responsibility for sustainability. Let's shape the future together!

Building technology and light management

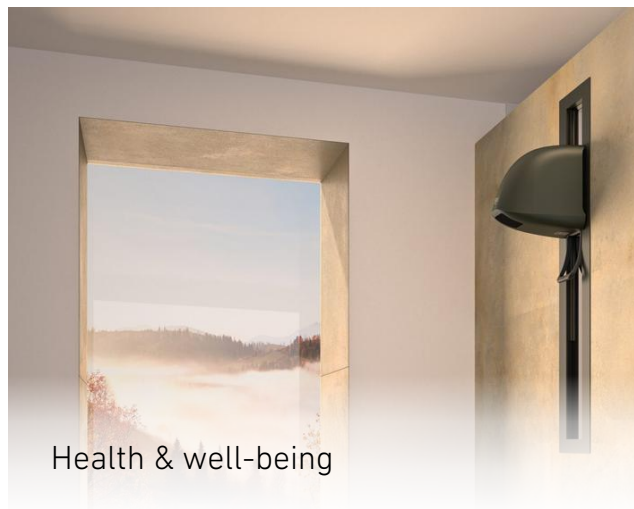

Energy management and e-mobility

Household technology

● References

Thanks to our extensive service portfolio, our customers include companies from a wide range of industries, including well-known market leaders and numerous hidden champions. Whether large or small, long-standing company or start-up – we are there to help as your competent partner, including with cutting-edge topics!

● Product solutions

In a world that is constantly evolving, product requirements never stay the same for very long. Our employees from all specialist disciplines regularly undergo further training. Benefit from this expertise and decades of experience. Our expertise, experience and commitment to your sustainable success.

We are inventors.

We give our all to make the products (simply) great for our customers.

When we do it, we make sure we do it right.

Our creative freedom sets us apart.

We find solutions together.

We are respectful, honest and eager to help.

Our customers love our services and the STEINEL brand.

● Our values

We uphold the agile manifesto and our mission statement. We prioritise individuals and interaction over processes and tools; functioning products over comprehensive documentation; collaborating with customers over negotiations; responding to change over following a strict plan.

● STEINEL Solutions as a partner

Our expert team works closely with our customers and partners. Being based in Switzerland offers a number of additional advantages: a stable political and economic situation, highly qualified specialists, first-class infrastructure, strong protection of intellectual property and the promotion of environmentally friendly technologies. Become part of our success story and transform your ideas into reality.

● Are you good at detecting synergies or opportunities?

Your idea, your product. Our commitment.
Our contact partners look forward to hearing from you!
